

HIGH PERFORMANCE IONOMER SEALING TAPES

Watertightness is one of the most critical factors in ensuring the durability of buildings and preventing damage caused by damp.

Our watertight sealing adhesive tapes, consisting of a high-performance polymer adhesive and ionomer carrier, provide effective protection to prevent infiltration, even in extreme weather conditions.

“ **IONOMER SEALING TAPES, A MORE
ECO-FRIENDLY AND RELIABLE ALTERNATIVE
TO BUTYL-BASED SEALING SOLUTIONS** ”

Main Benefits

Thick polymer adhesive

Highly conformable

Lasting over time, no risk of drying out or cracking

Very good UV resistance

Excellent resistance to water intrusion

Reduced curing time versus sealants

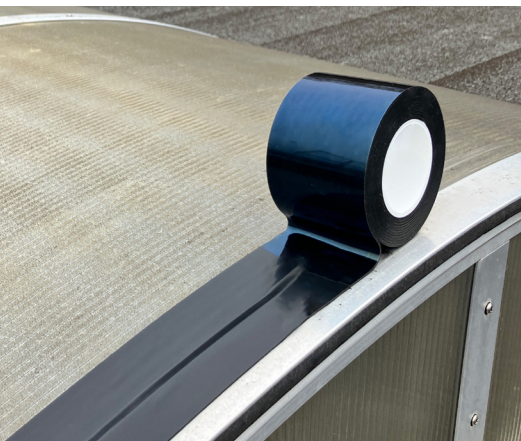

Optimum adhesion to a wide range of substrates

Makes joints, welds and rivets instantly and permanently watertight

Safe and environmentally friendly product

AVAILABLE IN 2 THICKNESSES & COLORS

- Tape color: white or black
- Total tape thickness (without liner):
 - 1 mm (40 mils)
 - 2 mm (80 mils)
