

# GERGONNE

The Adhesive Solution

## DIE-CUT COMPONENTS

Expertise, development and manufacturing of adhesive die-cut parts

# Know GERGONNE INDUSTRIE, specialist in adhesive tapes and flexible die-cut materials

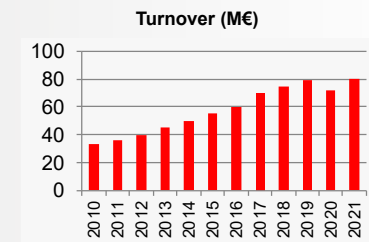

Since 1962, **GERGONNE** has become the specialist in the die-cutting of adhesive tapes and flexible technical materials (foams, rubbers, textiles, films, etc.).

Converting and manufacturing of technical adhesive tapes, Gergonne relies on this double expertise to meet the specific needs of customers.

## KEY FIGURES

- **100 % family-owned group**
  - **Workforce: 420 people**, Export 65%
  - **Turnover: 80 M€ in 2021**, Export 75%
- A financially-stable partner for long-term cooperation

## OUR MARKETS

A cutting-edge, state-of-the-art production technology serving 5 major markets:

Automotive & Transportation

Electronics

Industry

Healthcare

Construction

## WHAT MAKES US DIFFERENT

- **Vertical integration:** a global mastery from the adhesive masses formulation to the die-cutting components (according to the customer drawing), quality control
- **Value supplier:** a close relationship to better understand customer needs, advanced innovation and multi-market expertise
- **Agility:** simple and efficient organization for a better reactivity and availability
- **International presence:**
  - Headquarters: France
  - 9 Branches: Slovakia, Poland, Romania, Czech Republic, Spain, Morocco, Mexico, China and United-States

## CERTIFICATIONS

- ISO 9001
- IATF 16949
- ISO 14001
- ISO 13485

# Discover GERGONNE expertise, manufacturing and converting of industrial adhesive tapes

## LAMINATING

- Adhesive tape laminating to different raw materials
- Multiple capacities: from short to industrial series
- Single or double sided laminating
- Multilayer or temperature controlled laminating

## FLAT-BED DIE-CUTTING

- Nearly 60 years experience
- 15 presses and multi-technology production:
  - Selective cutting presses
  - Mobile-head and plunging presses

## ROTARY DIE-CUTTING

- **A unique expertise:**
  - Internal conception of our equipment
  - 12 Hi-Tech machines
  - Dedicated and highly qualified operators
- **Advanced technical capabilities:**
  - Camera control production
  - High complexity components

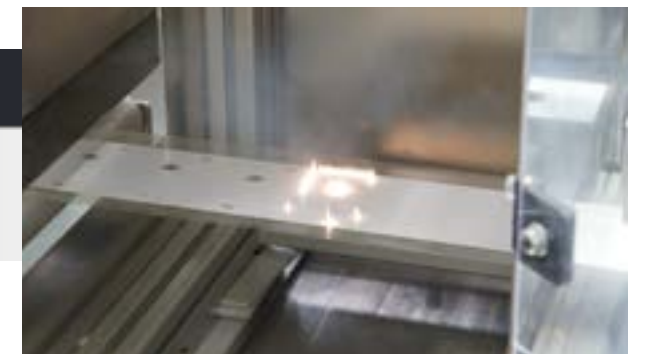

## DEVELOPMENT

- Engineering composed of 5 people
- Rapid prototyping capacity
- Automatic mounting of components: expertise and assistance to our customers

## LASER CUTTING

- Continuously running laser cutting
- Kiss-cutting or die-cutting

## Solutions tailored to your needs performance, quality, competitiveness

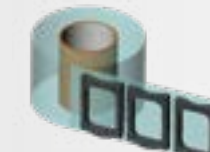

### Non-adhesive parts

Units

Sheet format

Rolls with removable adhesive tape

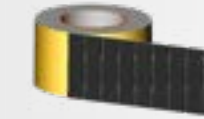

### Single-sided adhesive parts

Units

Units with fingerlift

Rolls with butt cut

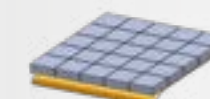

Units with split liner

Units with double fingerlift tabs

Sheet format (one piece)

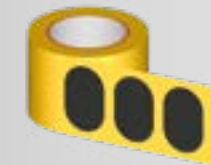

Sheet format (several pieces)

Rolls with waste removed

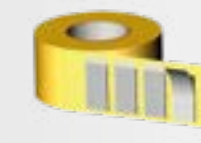

### Double-sided adhesive parts

Rolls without liner

Rolls with liner

Rolls with fingerlift

Rolls with continuous liner

Sheets with liner

Sheets with continuous liner

#### • Functional Requirements:

- Permanent & temporary bonding
- Surface protection
- Air/dust/water proofing
- Covering/Decoration
- Thermal & electrical insulation
- Heatshield
- Thermal dissipation
- Electrical conduction
- Noise reduction & sound insulation
- Vents & pressure compensation
- Filtration
- Spacing
- Sliding and non-slip pads

#### • Examples of converted materials:

- Mounting/Protection tapes
- Cellular/Sponge/Compact rubber
- Polyethylene/polyurethane/PVC/melamine foam
- Elastomers
- Non-woven
- Carpet
- Felt (synthetic and wool)
- Agglomerated felt
- Acoustic textiles
- Plastic films (PVC, PET, PC)
